

Create tool package

Ulf Kronsell - 2024-04-15 - [Tool package](#)

1. In the left menu, click **Tools**, then click the **Tool package** tab. Click **New package**.

2. Fill out ISBN/Article number if applicable, click **Save**.

3. Click the **Language** tab, click the primary language and add name and description for the package on the default language. Click **Save**.

To add a new language, click **New language**.

4. Click the **Products** tab. Select license type, renewal type, license duration, market and delivery channel. Products that are possible to incorporate in the package is listed. **NOTE!** There can only be one license-, and renewal type in a package. All tools also have the same license duration and delivery channel.

Click the checkboxes for the desired tools and click **Add**. Choose the number of licenses per product, then click **Save**. **NOTE!** Make sure that all tools you want to include in the package are published.
