 Tools Documentation 	Name tool package My new tool package	or Svenska			Primary language
 Tools Documentation 	Name tool package My new tool package Description	or Svenska			Primary language
 Tools Documentation 	Name tool package My new tool package Description	or svenska			Primary language

To add a new language , click **New language**.

4. Click the **Products** tab. Select license type, renewal type, license duration, market and delivery channel. Products that are possible to incorporate in the package is listed. **NOTE!** There can only be one license-, and renewal type in a package. All tools also have the same license duration and delivery channel.

Click the checkboxes for the desired tools and click **Add**. Choose the number of licenses per product, then click **Save**. **NOTE!** Make sure that all tools you want to include in the package are published.

NOTE! If you make changes to a product of a tool that is a part of a tool package, you will get information that this product is a part of a tool package and that the package may need to be adjusted. The package is unpublished until the adjustment has been made.

5. Click the **Sales** tab. Fill out price and VAT. Click **Save**. **NOTE!** A tool package cannot have price on request and also note that it's not possible to assign a discount to a tool

package.
